

*Cusat Recognises IITM-K as Research Centre

Express News Service

T°Puram: The Indian Institute of Information Technology and Management-Kerala (IITM-K) here has been recognised as a research centre by Cochin University of Science and Technology (CUSAT).

With the recognition, the stature of the institute, located on the Technopark campus, has been elevated from that of an academic institution to a research institute.

It will primarily benefit students who would like to pursue research leading to award of PhD, according to an official press release.

"The stature of the institute's faculty also gets elevated in the academic community as they acquire eligibil-

ity to apply for guide-ship. It will also expand research opportunities for MTech graduates and aspiring faculty of various engineering colleges," it said.

The institute offers advanced research in various domains, including Computer Network and Information Security, Embedded Systems, Machine Intelligence, Artificial Intelligence, Medical Imaging, Distributed and Object Oriented Systems and Computational Sciences in Drug Design.

IITM-K serves as a much sought after forum for academic exchanges and research deliberations in emerging areas of Embedded Technologies, Language Computing, Medical Informatics and Cybernetics, the release said.
